

Protecting schools investment in technology, and student access to learning through technology

THE CHALLENGE:

Barisschool (Primary School), Het Laerhof, <https://www.hetlaerhof.be/> located in Merksam, close to Antwerp is a modern, forward thinking primary school where staff support children to learn through modern technology. The primary school has many ongoing initiatives which reinforce this way of thinking, including being the only primary school in a remote region to have a Lego innovation studio within their school walls.

All forms of modern education are important to Barisschool. Het Laerhof are using iPad tablets extensively when compared to other Belgian schools. As school environments are busy, iPads are costly, and expensive to replace, they required a protective, cost effective solution to ensure their devices were kept safe over, with minimum cost incurred to repair and replace iPads.

DID YOU KNOW?

As many as 25% of tablets need to be repaired or replaced every year due to damage.

THE SOLUTION:

The OtterBox UnlimitEd Series case was selected from a full range of tablet cases to offer optimum protection for the schools technology investment. They cover 350 5th and 6th generation iPads, a significant investment from a primary school.

Remarkably protective, OtterBox UnlimitEd Series is engineered to meet the unique requirements of classrooms. Offering the OtterBox guarantee of Certified Drop+ Protection, UnlimitED protects against drops, bumps, dust and scratches, has a built-in screen protector for added peace of mind, as well as a built-in stand for typing and additional viewing angles. Exactly what students require in a school environment.

Without a reliable solution like OtterBox, the scheme would not be feasible, and to date all iPads are in perfect condition and none have been broken - a testament to the OtterBox brand and the OtterBox UnlimitEd Series.

Avoid damage, and let OtterBox guide you through our protective solutions to suit your schools needs.
